.132 Duplex and multifamily dwellings subject to the following limitations and the developer has conducted at least one neighborhood meeting prior to application for the purpose of hearing neighborhood concerns and suggestions regarding the proposal. Where being developed in an existing neighborhood characterized by residential development at densities of one dwelling per acre or greater, the uses listed in this section shall be administered as conditional uses rather than administrative approval uses; and are subject to the same criteria, requirements, bonuses and restrictions as if they were administrative approval uses:

- (1) Duplex and multifamily dwelling units do not comprise more than 25 percent of the total dwelling units allowed for the entire site.
- (2) Duplex and multifamily dwelling units are constructed at the same time as, or after, at least 50 percent of the single-family units in an approved development.

- (11) Detached accessory dwelling units shall be located so as to minimize visual impact to the public right-of-way and to adjacent properties. Location in immediate proximity to the primary residence is preferred. Location closer to property lines than to the primary residence may be considered by the administrator when such location serves the goal of reducing overall visual impact to public right-of-way and adjacent properties, and such location still meets

the setback requirements as stated in Chapter [20.80](#) WCC. To minimize environmental and visual impact the applicant may be required to provide fencing and/or planting to screen the unit from public right-of-way and adjacent properties;

(12) All mobile homes must demonstrate compliance with minimum HUD Fire Safety Standards and compliance with Washington Administrative Code (WAC).
